

## ADMIRALTY Digital Sailing Directions beta (v0.6) release: Install Guide

### Installation

The downloaded .zip file must be unzipped/extracted to allow the setup.exe file to work.

Right-click the downloaded .zip file and select Extract All

Open the extracted folder

Double-click the Setup.exe file

If you have participated in testing a previous version of ADMIRALTY Digital Sailing Directions (ADSD), please uninstall the previous version through the Windows 'Add or remove programs' tool before downloading and installing the beta (v0.6) software.

### Activation

The installed software will need to be activated before first use. The following username and password can be used:

**Username:** Beta06Test

**Password:** Password123

### System Requirements (Operating System)

ADSD runs on the Microsoft Windows operating system.

ADSD will run on computers with minimum specifications meeting those required by the operating system. However, for improved performance, it is recommended that the minimum machine specification is as follows:

**Processor:** 2gigahertz (GHz) with 4 or more cores

**RAM:** 8 GB

**Graphics card:** DirectX 12 or later with WDDM 2.0 driver

**Display:** 720p (1280x720)

**Operating System:** Windows 10 64bit
